SUMMARY

AI-focused software engineer with 3.7 years of experience building production-grade applications and integrating AI-powered systems into real-world workflows. Hands-on experience with LLM-based solutions using OpenAI APIs, prompt-grounded content generation, document intelligence pipelines with Google Cloud Document AI, and embedding-based relevance models for semantic matching. Currently pursuing an M.Tech in Artificial Intelligence to strengthen foundational knowledge in machine learning, model evaluation, and statistical learning, complementing applied industry experience.

WORK- EXPERIENCE

FULL STACK DEVELOPER

VATSEE LABS PVT. LTD. | 1.6 years *Dec 2023 - May 2025*

Artificial Intelligence-Driven Travel Assistant App

- Built an AI-powered travel assistant by dynamically fetching travel blog and magazine content via URLs and grounding OpenAI LLM responses with this external context to generate personalised travel recommendations.
- Designed prompt structures to control response relevance, tone, and personalization based on user preferences.
- Developed backend services in Python 3.10 and Flask to orchestrate AI workflows and user requests.
- Created a retrieval dataset using Google Maps API to ground responses in real-world place data.
- Implemented RAG to improve response relevance and reduce hallucinations.
- Designed MySQL 8.0 schemas for user profiles, preferences, and interaction logs.

Health Report Processing and PII Extraction

- Built an automated health-report processing pipeline using Google Cloud Document AI.
- Reduced manual data-entry effort by 90% through PII and medical-metric extraction.
- Implemented Python-based validation and transformation of structured health data.
- Deployed on AWS EC2 with MySQL on AWS RDS, improving response time by 30%.

SOFTWARE ENGINEER

INNOVA ESI PVT. LTD. | 2.2 years *Nov 2021 - Dec 2023*

- **JobMojo.ai — AI-Enabled Recruitment Platform**
- Implemented AI-driven candidate sourcing using sentence embeddings to improve relevance matching.
- Integrated a trained Random Forest model to predict candidate willingness and suitability.
- Exposed ML inference through REST APIs using Python and Flask.
- Built Angular dashboards to display AI-ranked candidates and recommendation scores.
- Optimized MySQL 5.7 queries for candidate data, embeddings, and model outputs.

SKILLS

Applied AI & Gen AI

- LLM integration using OpenAI APIs (prompt-based workflows and context grounding).
- Prompt-grounded content generation using external data sources (URL-based content injection).
- Sentence embeddings and semantic similarity models (resume-JD matching).
- Document intelligence pipelines using Google Cloud Document AI.

Machine Learning

- Supervised & Unsupervised Learning

- Traditional ML models: Logistic Regression, Random Forest
- Feature engineering & data preprocessing
- Model evaluation metrics (accuracy, precision, recall, similarity scores)
- Basics of fine-tuning & loss functions (CosineSimilarityLoss, MNR)

Engineering

- Python 3.10, Flask, REST APIs, Node.js, Angular (11–16), MySQL (5.7 / 8.0), AWS EC2, AWS RDS, Google Cloud Platform

Tools

- GitHub, Bitbucket, Selenium, Google Maps API

PROJECTS

Automatic Resume Screening Using Sentence-BERT

- Built a semantic resume-JD matching system using SBERT embeddings and cosine similarity.
- Evaluated multiple SBERT models; fine-tuned using MNR loss for improved relevance
- Achieved significant improvement over keyword-based filtering.

AI's Eye on the Sky: Differentiating Drones and Birds

- Developed an image classification model to distinguish drones from birds, comparing ResNet50, Vision Transformer (ViT), and CNN + SVM approaches.
- Observed that ViT achieved the highest classification accuracy, though with increased training time and inference latency compared to CNN-based models.
- Implemented and evaluated fine-tuned ViT and a hybrid CNN + SVM model, where the hybrid approach reduced latency and training time while delivering the second-best performance.

CERTIFICATIONS

Google Cloud Certified Cloud Digital Leader - Google Cloud

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional - Oracle

EDUCATION

M.Tech., Artificial Intelligence (Pursuing)

SRM Institute of Science and Technology Jul 2025 - Present

Focus Areas:

Machine Learning fundamentals, traditional ML models, model evaluation, statistical learning, applied NLP concepts

B.Tech.,Mechatronics

Hindustan Institute of Technology and Science Jul 2016 - Jun 2020

LANGUAGES

TAMIL

ENGLISH

HINDI
